

Fire Danger Potential

Household fires and wildfire are high risks on the Reservation

7 tribal community members have lost their homes to fire in the last 9 years

Insufficient fire flow and lack of working fire hydrants within the proximity of the home have been noted as reasons for the catastrophic nature of the fires

In 2011 a total of 19 homes were lost in the Town of Big Pine due to a wildfire

Fire Hydrant Replacement

Fire Hydrant Replacement Project - 45 of the 63 fire hydrants have been replaced due to age or because they are obsolete through funding obtained from IRWM Program

The other hydrants were replaced through a different project.
